IN RELATION TO THE PAILURE OF CULVER, PENN & CO.

[CONTINUED.]

As the first step in the execution of his plans, he (Mr. Hoge) made the following affidavit in the ground for my arrest:

he (Mr. Hoge) made the following affidiavit as the ground for my arrest:

OF VERNAGO GOUNTY,
NO '108, Angust Torm, 1866.

Thomas Hoge vs. Charles Vernang County, vs.
Before sign, the Votanointy of the Common Pleas in and for the county of Venango, personally came Thomas Hoge, who by me being duly sworn according to law, deposes and says, that he is the owner and entitled to the possession of the bonds hereinafter mentioned and described. And the deponent further says, that some time prior to the 28th of November, 1865, he purchased and became the owner of a large number of bonds issued by the United States, denominated five-twenty bonds, which said bonds boro interest at the rate of six per cent, which said interest was payable semi-annually in gold coin of the United States; that said bonds were dated November 1st, 1864. And deponent says, that he said bonds more dated November 1st, 1864. And deponent says, that he said bonds are dated November 1st, 1864. And deponent says, that he said honds amounted in all to the sum of twenty thousand dollars, and that there was due and payable upon said bonds, in gold as inforcently, on the list day of May, 1866, the interest for six mouths, amounting to the sum of six handled dollars. And deponent further says, cometine prior to the 28th of November, 1865, he deposited the said bonds, as a special deposit, for their safe keeping, in the Verwango National Bank of Franklin, a body corporate under and pursuant to an Act of Congress, entitled "An Act to provide a national currency," &c., passed June 3, 1864, of which and bank the said duffendant, Claries Vernon Cultver, was, as deponent was informed and believes, a stocktolder. "An Act to provide a matismal currency," &c., passed June 3, 1864, of which said bank the said defendant, Charles Vernon Cuiver, was, as deponent was informed and believes, a stockholder. That said bonds were in said bank as atcressed on the said 28th day of November, 1865; and deponent crys that on or about the said 28th day of November, 1865, the defendant, Charles Vernon Cuiver, at Franklin, in said county of Vernango, wronginly rook the said county of Vernango, wronginly rook the said bonds from the possession of this deponent and then and there wronginly converted the same to his own use. And deponent rather says, that the said bonds, so as aforesaid taken by the said defendant, were worth, at the time lgst aforesaid, over and above the interest which had then accrued it ereou, the sum of twenty thousand and five hundred dollars. And that by reason of said wrongial acts, so done by the delendant as afore said, this deponent has suffered damage, to wit. In the sum of twenty-two thousand dollars, as deponent verify believes.

Now, If the charges in this affidavit were true my offence would be larceny, for I was not an officer of the bink, and could not have taken these houds, without Mr. Hoge's consent, by any other means than theft. If his course well-prompted by a desire to bring me to justice as an offender against the law he should have artested me for laterny. appear at court, you song to orng to orns a presture so heavy, an opposition so relientless, in public prejudice so litter, that I would seek refuge in flight.

To stray public opinion against me, you caused exaggenated and distorted accounts of the occasion and circumstances of my arrest to be published in pagers at various points, and thus he suggented a system of the most unjust missepressuration. The rumors set alloat by him with your aid, purposely in different forms, were multiplied and interwoven until they formed a combination of the most fearful clarges, under the influence of which you calculated my character and reputation should be blasted—leaving me powerless even for defence.

These published rumors were alload by the most withully dishonest, and reckless personal misstatements made by you to all who, from curlosity or interest, would lend a listening eur. Wherever you were, whether among our citizens at home, or among stringers elviting our hotels, or while traveling, you have industriously presented this work of infany and not without success. The wide-spread repetition of those false-hoods had the effect to prejudice public opinion before the proofs of their tabily could be presented.

The next stop was an attempt to allengte my

cas. The wide-spread repetition of those falseloods bad the effect to priquide public opmonbefore the proofs of their talsity could be presonted.

The next stop was an attempt to alternate my
friends who were faithful to me here in defenuing the sgainst your attacks and becoming my
security as often as required. This you soughtto do by charging them with seling corrupted,
intered with money to detend me, and with preventing creditors from getting their money, by
standing in the way of Justice, and keeping me
from going to prison. You filed to irighten
some who were on the bonds given upon my
first arrest, by the declaration that you knew I
was going to Europe shoutly, and would leave
them responsible for the bond. This you hoped
would be so disheartened by the apparent desertion of my known friends, that I would yield the
struggle, and either pny Mr. Hoge's debt by
fraudulently appropriating to that purpose properry conveyed to creditors under our assignment,
or that if east into prison, I would embrace the
first opportunity to escape, which you would
be collected from the securities on my hond to
him. This effort proved at Lare.

Mr. Hoge seeing that he had placed himself in
a dangerous position, and had made himself
subject to a criminal prosecution for perjary, and
to a chil action for dataogas for table Imperovment, became more desperate in his purpose to
critish me, in order to seems his our safety—
Having exhausted himself in the cases sheady
and make me, a plan was suggested by Mr. Myers

xon never asked what facilities the dupartmen had for keeping saledy the securities duposited while in tact more than a million deliars wer kept in an ordinary safe that any burglar of com-mon skill could have forced. This was remedied by my purchasing an expensive first-class and for the use of the department until the legisla-ture could authorize requisite provision to be made.

It was left entirely with me to determine who the circulation should be increased or diminished, and the securities deposited therefor wandrawn. You nover passed more than too resolutions upon any of these subjects, both of which

I have used for the past year, la my has at Tance ows, one of "Epear's Anti dus or Coal Stoves" and at "Oriental Coal Stove" and found from actual experi suce that the "Oriental Stove" of same size, consumethe "Anti-duster." The "Anti-duster" was a good show until I got an "Oriental," when I found that it Filto, a rate combination of chemicals for the pu was of an account by the alde of the "Oriental". The diff renes between the two kinds of slove is simply this: That the "Oriental" runs itself and requires but little coal and will keep constant and steady for for countly, while the Anti-duster requires constant con country, while the Anti-ductor requires constant order, frequent replicability of Rad, gives an uneven heat and ronaumes considerably more road, and will get clogged up and go out and has to be tonded with as much care as abilly. I have thrown out the "Anti-ductor" and given it away and put up an "Oriental" in its place and ave made money in the operation. C. H. Augs.
